Summary

An enthusiast when it comes to computers and technology. A developer, architect and an entrepreneur. Know more about me at www.tvvignesh.com

Experience

Programming Analyst Ramco Systems

May 2016 – Present (2 years) | Chennai Area, India

Currently working on modernizing various aspects of the product and its infrastructure. I work in NGT (Next Generation Technology) department which is responsible for developing strategies to adopt new technologies within the organization to explore new opportunities and bring the overall cost of the organization down.

Also worked on interesting tech which includes bots, mobile apps (android & ios), material design, integrations which included products like Microsoft Teams, Evernote, Twilio, etc.

Also started the practice of holding Meetups @ Ramco (a.k.a Ramco Nuthouse). You can find the website for the same here: <https://thenuthouse.github.io>

Check out my resume for the work I did there.
