PORTFOLIO

Empsense Web App

- Made the web app for empsense using HTML, CSS, Javascript (AngularJS & JQuery), NodeJS, MongoDB, Material Design using Angular Material.

The webapp can be found at <https://empsense.ramco.com>

Empsense Mobile App

- Made the hybrid mobile app (android) for empsense using IONIC 1.

The app can be found at
<https://play.google.com/store/apps/details?id=com.ramco.hcm.empsense>

Empsense Bot

- Made the Empsense Bot using Microsoft Bot Framework (NodeJS) for Microsoft Teams and skype.

The bot can be found at <https://teams.microsoft.com/l/chat/0/0?users=28:d7c11157-7535-44c4-af2d-48d286a311ed>

JLT Bot

- Added Evernote & Asana Integrations for JLT Bot.

The bot can be added by visiting <https://bots.ramco.com>

Friendbus

- Worked on my startup (a social networking website named Friendbus) aimed at solving all the problems which Facebook had along with providing some interesting features for people to use.

Project was made in PHP, MySQL, HTML, CSS, Javascript (JQuery), Bootstrap.

Shutdown due to various reasons. Project made opensource and code available at
<https://github.com/tvvignesh/friendbus>

Ubuntu Cleaner

- A small shell script which helps in cleaning all the junk and free space in Ubuntu. Source can be found in <https://github.com/tvvignesh/Ubuntu-Cleaner>

Telephone Management Systems

- A project done during my schooling as a part of TCS Workshop aimed at creating a Telephone Management System using C++

Source can be found at <https://github.com/tvvignesh/Telephone-Management-Systems>

Time Tracker

- An amateur project done during my college days. It is an app which helps doctors administer medicines to people at regular intervals.

Project done using JQuery Mobile, Corodva, SQLITE

Source can be found at <https://github.com/tvvignesh/Time-Tracker>

The source of my other projects done in the past can be found at:
<https://github.com/tvvignesh?tab=repositories&q=&type=source>

My other work includes:

- 1) Research and prototype implementation of Google Actions Bot
- 2) Research on JIRA API
- 3) Screen recording using PhantomJS
- 4) Integration with third parties like Hub3c for Single Sign On with autodiscovery
- 5) Chrome app & extension for empsense (which is phased out now since Google stopped support for apps in chrome)
- 6) Research on Electron APP
- 7) Research and prototype implementation of Empsense App for IOS devices
- 8) UAT Server management for Empsense
- 9) Architecting various AI based algorithms for Peer to Peer mapping.
- 10) Managing demos, implementation and promotion of Empsense including testing, reviewing and setting roadmaps.
- 11) Organizing workshops & training session for people in my college days
- 12) Working as Web Administrator for many clubs in my college days
- 13) Managing a team of 120 for my startup while in college and also releasing a magazine which can be found at
